# The emergency of the poorest

- There are poor, which do not even have the most necessary for life.
- There are children, who cannot visit a school.
- There are young people, who cannot to learn and no life perspective attain an occupation.

- Their environment strives after forces, is however in many cases in a not substantially better situation in life.
- We try to help them.

## Of humans for humans

The Lazarus welfare organization fights daily for the improvement of the bases of life of exploitations:

For this purpose we want to realize a self-supporting ecological vocational training center in Kerala after European standard with integrated production for the five **basic occupations carpenters, bricklayers, electrical plumber, sanitary plumber and plumber.**

More information [www.lhw.li](http://www.lhw.li) and [www.lpct.in](http://www.lpct.in)

## Independence in the occupation brings jobs.

The demand analysis locally showed that this is very much welcomed. "Lazarus" would like that the population profits locally and receives knowledge, know-how and new SME's locally. We would like to begin a certain education gap to close. Many organizations engage themselves strongly in the ranges training and university formation. The range of a more qualified professional training is only in the beginnings understood.

We want to establish a training center for occupation teachings relating to crafts after European model. In it the five basic occupations for the building of houses are to be trained, in addition we co-operate with the Marian engineering college and the St. Xavier's of institutes OF Technology in Kerala. No organization prepares so far the apprentices for an independence. **Only we want to secure the starting capital for their own enterprise for each apprentice with the apprentice wages.**
